

On 10 April 1924, with no permanent medical plan in place, about one hundred of the employees at Lock 3 sent the following petition to the Engineer in Chief. (This agreement would provide the same facilities as were provided at the time at Lock 5 and which were proposed for Lock 2.)

1. That the present arrangements for the doctor to visit the works weekly to remain as at present, sixpence per week being subscribed by each employee.
2. That an arrangement be made with the Barmera Hospital authorities by which all employees shall receive all nursing and medical attention, including dressings and medicines they may need at that institution, free of any charge.
3. That a further sixpence per week be subscribed by each employee for such privilege

Signed:
